

RACING vs PASION

ADITIS RACING

About Us

We are a Czech team established in 2017 in Brno. Our racing team primarily competes on European circuits. Initially focused on endurance races, we have since transitioned to the TCR category, where we now hold a strong position among the top teams in the TCR Eastern Europe championship. In touring car competitions, we showcase two AUDI RS3 LMS TCR cars.

News

In 2024, we expanded our racing lineup by adding the PORSCHE 911 GT3 CUP 992, which allows us to compete in the GT CUP series. Additionally, in 2025, we ventured into the realm of virtual racing. Through our collaboration with the WSR Esports team, we are actively participating in various international sim racing events.

Drivers Support

Earlier this year, we acquired a Renault Clio Cup V to foster young talent and support experienced racers. This new initiative aims to provide aspiring drivers the chance to break into the world of motorsport and guide them towards a successful career path.

OUR GOALS

This season, our team has established several ambitious goals that we aim to achieve. In the **TCR Eastern Europe** championship, we are determined to accomplish what eluded us last season: reaching the finals. Our objective is to secure victories in both the overall driver and team rankings. We have demonstrated our capability and strength to compete fiercely for both titles.

A new addition for our team is our participation in the **Porsche Sprint Challenge Central Europe** championship, where drivers race against each other in the identical Porsche 911 GT3 Cup 992 cars. This series presents a significant challenge for our drivers, and we believe it will provide us with valuable experience and, with a bit of luck, potentially some trophies.

As we look ahead to the 2026 season, we plan to broaden our activities by joining the highly regarded **Clio Cup Bohemia** championship in Central Europe. This series boasts a rich race calendar and a diverse field of competitors, varying in nationality and experience. We are hopeful that our drivers will thrive amid the strong competition.

MEDIA

During each race weekend, our team collaborates with professionals to produce unforgettable video montages and captivating photo shoots. All races are streamed live on YouTube, offering advertising opportunities for our partners directly within the broadcast. Our social media platforms attract hundreds to thousands of followers daily, primarily aged 18 to 35. This demographic is crucial for fostering interaction and gathering feedback. We aim to promote not only motorsport as a whole but also circuit racing, making it more accessible to young people and encouraging their participation in the events at the circuit.
