## Installation Environment

Before Installation:

The FacePass working temperature:  $0^{\circ}\text{C}$ --- $45^{\circ}\text{C}$  , working humidity: 20%---80%

Direct sunlight would cause great impact on the face recognition performance. So the terminal is not allowed to be installed outside. Please install the terminal indoor and avoid strong light shining straight into the camera.

## Installation Steps

### Step 1: Installation Position

The best verification distance of FacePass is 11.8"-31.5" (30-80 cm)

and the best image capture angle of the camera is level:  $\pm 20^{\circ}$ , vertical:  $\pm 20^{\circ}$ .

The recommended installation height is 43.3" (110cm) from the ground.

In this position the FacePass can capture body height ranging is 57"-76.8"

(145-195 cm) the person's face image is in valid verify distance.

For the actual installation height please refer to the user's height.

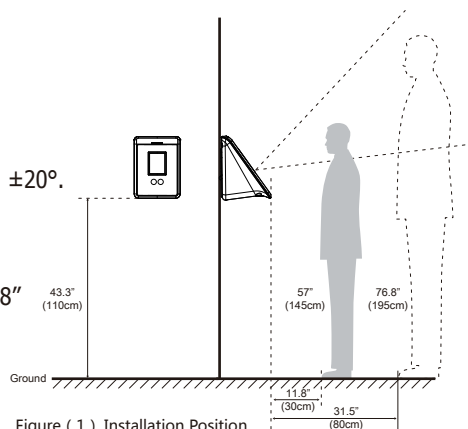

Figure ( 1 ) Installation Position

### Step 2: Holing fot the Steel Bracket

- (1) Please refer to the size of the steel bracket, mark out the screw and wiring holes. Make sure the back board is on horizontal position.
- (2) Drill the hole (Recommended dia.6 mm).
