ChowBOX

Water Proof Intelligent Gate Control System

kaitron

ChowBOX is an intelligent access control device designed for enterprise storefront logistics management. It comes with waterproof functionality, ensuring no worries about equipment failure due to humid weather. Additionally, it supports remote control, Wi-Fi, Bluetooth, and wired network connections, allowing for seamless switching between them.

Whether you are operating the device from nearby or remotely, it provides convenience and can also be used at home to control both garage doors and pedestrian gates simultaneously.

ChowBOX provides everything you need.

Kaitron

ChowBOX offers multiple operating methods.

ChowBOX supports four different operating methods: remote control, Wi-Fi, wired network, and Bluetooth.
Users can freely switch between these options for their convenience.

"One machine, dual-use design."

"Four relay, it can simultaneously open both the "roller shutter" and the "outdoor door" and can be combined with various types of door control systems, including AC roller shutters, DC roller shutters, and various types of Gate openers.

"One-click sharing permission."

Initial permissions can be freely shared with up to 10 people.
For more than 10 people, access to permissions can be obtained through paid subscriptions.

"Supports real-time monitoring."

It supports other Chow series products such as ChowCAM and ChowBELL, as well as other monitoring products.
You can integrate all of them into your smartphone using the Chow!APP.

An outdoor, waterproof and durable product

With an IP56 waterproof rating, you can confidently install it in outdoor environments without worrying about water damage.

Microchip	ESP32-WROVER-E-N16R8
Frequency	2.4GHz
Network	RJ-45
Output/Input	Rely x4
	Photocell x2
	Sensor x1
Button	RF x1
	Pair x1
	Reset x1
Support protocol	802.11 b/g/n , Bluetooth,BLE
IP Rating	IP56
Size	140x104x44.3mm
