

GeneProof is a **hi-tech company** from the heart of the European Union that **develops, manufactures and distributes** technologically advanced, high quality and user-friendly **PCR products** that are used in laboratories around the world.

Right now, we are establishing a **new company division** that will specialize in the development and production of **oligonucleotides**.

To **start this division**, we are looking for experts for the **following positions**

Head of Oligonucleotide Synthesis Division

A **capable manager** with significant **experience** in oligonucleotide synthesis. Your first and crucial task will be to **build your work team**. You should be able to use your experience in this field to find the **right experts**. Following this, you should be a capable **leader** with a vision who can lead the team and set the direction of **product development** in this area.

Oligonucleotide Chemist

Experienced biochemist in automated solid-phase synthesis techniques **specializing in DNA/RNA synthesis**.

Oligonucleotide Specialist Analytical Chemist

Experienced in isolation, purification, and characterization of **synthetic nucleic acids** and their **derivatives** using various technologies such as HPLC (RP, IEX), MS, UV.

We are a team of people with a **passion for our work**, based in **Brno** in the **modern Vienna Point complex**. Do you want to know what we're like? Then **look on the other side!**

What can you expect from us?

You can **look forward** to a **pleasant** and **relaxed** atmosphere in the workplace. There is an **unlimited supply of coffee** and a **door open at all times** to any colleague in the company. Everyone here is **ready to listen** to you - from the specialists in production to our CEO or Chief Visionary Officer, with whom you are likely to be in **regular and intensive contact**.

We're **not a corporation** - even though we're growing fast, we still manage to maintain **warm relationships**. Walking down a hallway full of people and you don't even know who they are? **That's not gonna happen here**. Even though we require you to have experience for positions in a new division, you **don't have to worry**. We have a very **sophisticated on-boarding process**, during which we will thoroughly familiarize you with GeneProof.

If you want to participate in the growth of a **hi-tech young company** that is **becoming a world player** in the field of molecular in-vitro diagnostics, don't hesitate to apply for one of the above mentioned positions. **We look forward** to hearing from you! Just send us your **CV** and **cover letter** in English.
