

GPack

Covid-19 • Flu • RSV

Differential diagnostics of many pathogens from one sample
in a single run

NEW
GPack

Simplify your laboratory workflow!

One sample
One extraction
One PCR run

**many
results**

Covid-19 • Flu • RSV GPack contains:

- GeneProof SARS-CoV-2 Advanced PCR Kit, 100 rxn
- GeneProof Flu Multiplex PCR Kit, 100 rxn

1 SAMPLE - 5 EXAMINED PATHOGENS

- Diagnostics of SARS-CoV-2, *Influenza A*, *Influenza B*, RSV A/B
- The same symptoms – different diagnosis

EXCELLENT QUALITY

- Quality proven by EQA panel results
- Unique specificity for SARS-CoV-2

UNIVERSAL PCR PROFILE

- Enables the combinability of PCR kits from different diagnostic groups in one run
- Simplifies laboratory workflow and saves time

TECHNOLOGICALLY ADVANCED PRODUCTS

Easy-to-Use concept

- Single tube Ready-to-Use Master Mix
- No additional PCR reagents pipetting necessary

Contamination prevention

- dUTP-UNG contamination prevention technology

False negative results control

- Unique internal control for the control of the whole diagnostic process including RNA extraction, reverse transcription and PCR amplification
- Endogenous internal control for the control of the proper sampling

**COMPATIBLE WITH A WIDE
RANGE OF REAL-TIME PCR
DEVICES**

**CERTIFIED
DIAGNOSTIC TESTS**
