

POWERING THE SPRINT CAR MOTOR USING A FUEL CELL

Disconnect the green storage tank assembly from the electrolyzer by twisting the male/female valve.

Attach the tube with the clip to the nozzle on the short end of the fuel cell. Leave the clip closed for now.

Attach the tube with the purging valve assembly to the valve on the long side of the fuel cell.

Attach the black and red clips to the motor assembly as shown.

POWERING THE SPRINT CAR MOTOR USING A FUEL CELL

Press the tab on the white clip to open it and allow the hydrogen to flow through the fuel cell.

Listen carefully! You should be able to hear the hum of the motor as the shaft turns.
